

SLSP – A national platform for Switzerland

Reinventing ourselves The local/regional becomes national

DACHELA User Meeting, Mannheim, 25.-26.06.2019

Jeanette Isele · Ruth Süess

Agenda

- 1 The library landscape in Switzerland**
How everything started...
- 2 SLSP – Provenance and goal**
An overview
- 3 The SLSP System**
The platform and HQ
- 4 Who benefits from our services?**
The customers
- 5 The challenge of relationships in a new structure**
Goals, topics and tasks

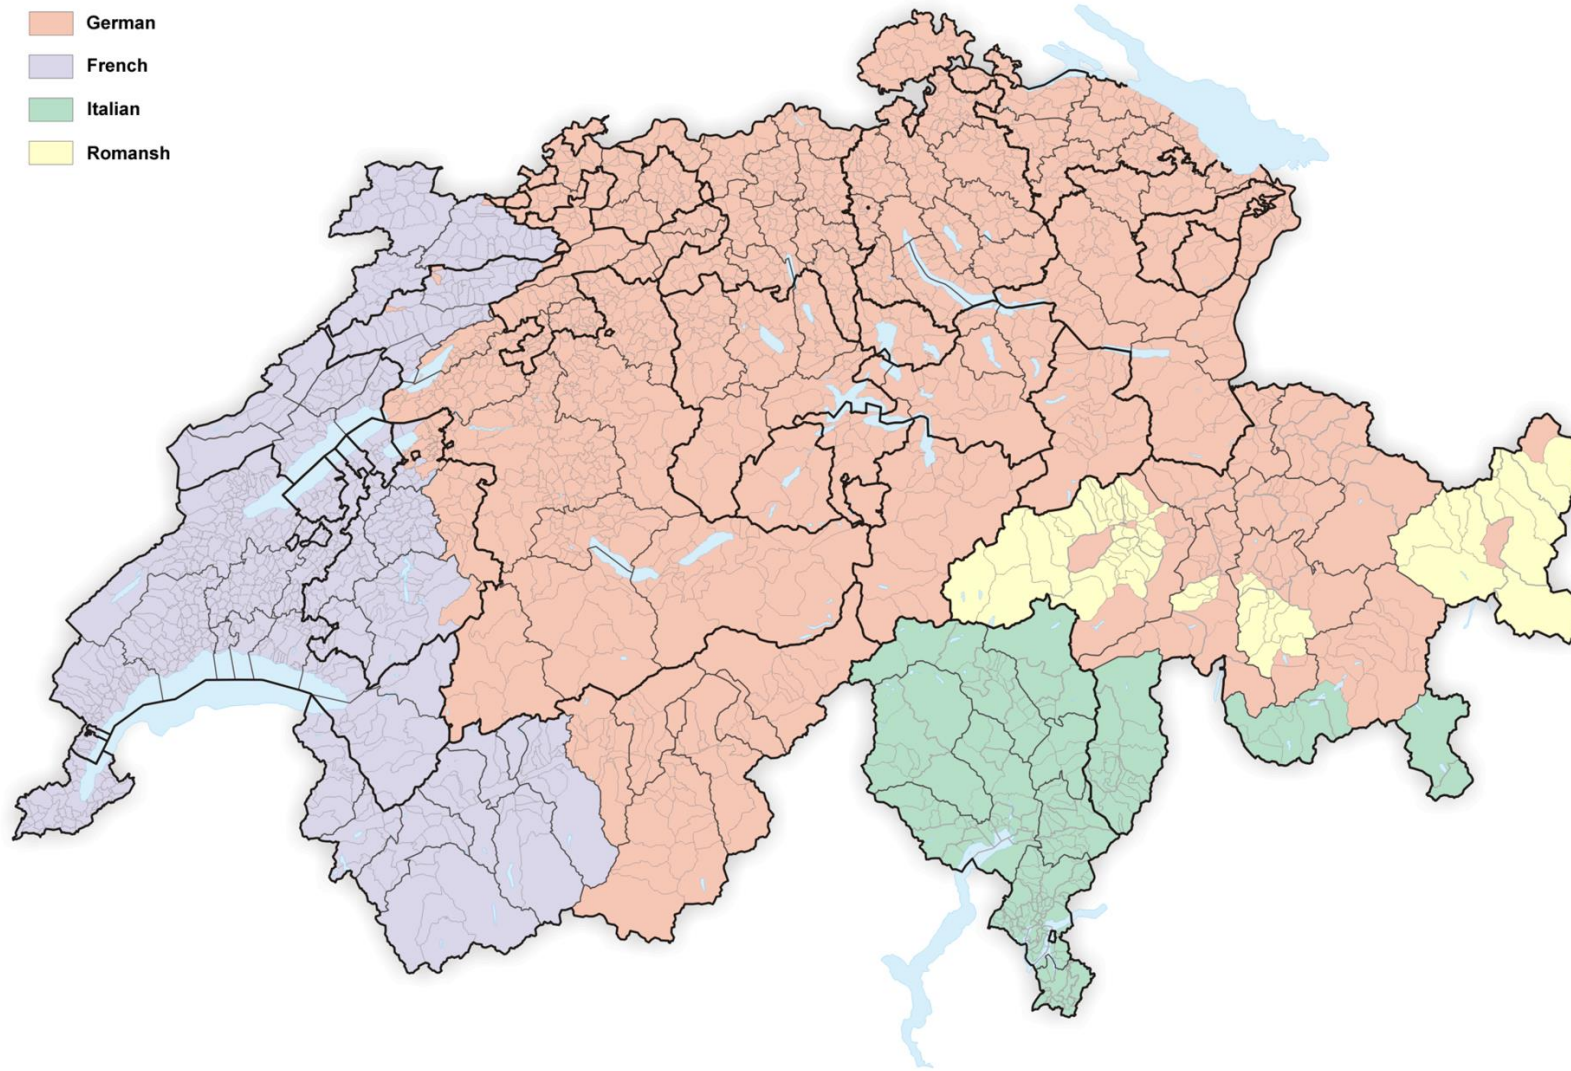

SLSP – A national platform for Switzerland

The library landscape in Switzerland

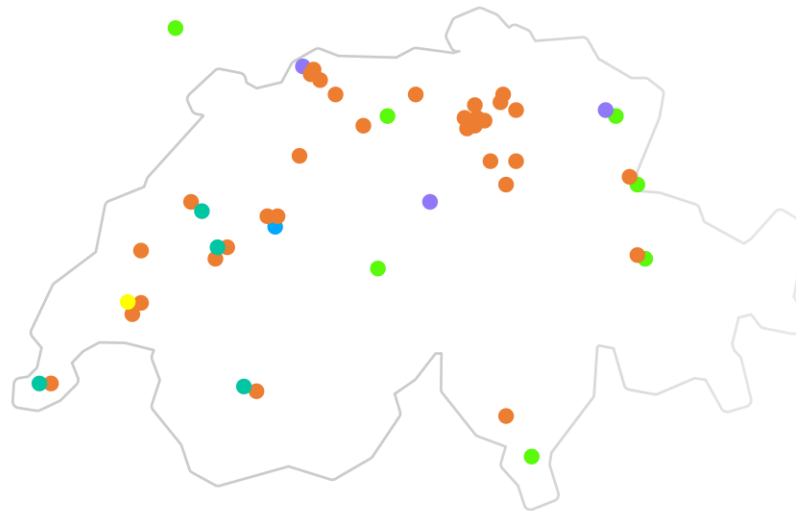

Language regions in Switzerland

- German
- French
- Italian
- Romansh

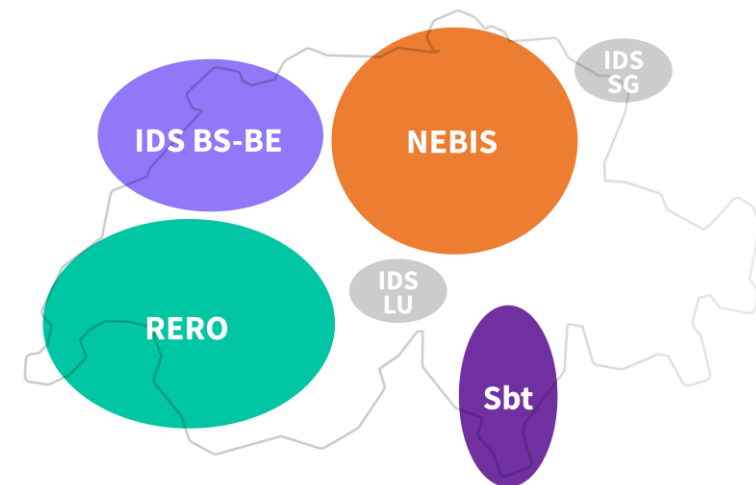

Disintegrated academic library networks today

7 academic and semi-academic library networks of differing sizes and quality in Switzerland today.

Networks

- NEBIS
- Nationalbibliothek
- Renouvaud
- IDS
- RERO
- autres

SLSP

Provenance and goal

Provenance

15 scientific institutions decided in 2015 to join forces to initiate **the future of information management** and create a launching platform into the future.

A visionary project of scientific institutions for education, research and progress.

Organization chart of SLSP

Join forces

We **unite** and **disseminate** Switzerland's comprehensive **scientific information**.

SLSP Chronology

October 2014	Proposition for a national platform by ETH
2015 – 2017	Feasibility study by 9 HEI, funded by the national Swiss scientific development program
February 2017	Decision for implementing a national library service platform for academic libraries
May 2017	Formation of SLSP Ltd. with shareholders from 15 HEI
December 2017	Award of contract for Ex Libris to implement Alma and Primo as library system solution
May 2018	SLSP office in Zürich
May – August 2018	Contract negotiations with Ex Libris
September 2018	Project start with Ex Libris (SLSP + 10 HEI as vanguard institutions)
<i>December 2020</i>	<i>Go Live with c. 540 libraries (1st wave)</i>
2021 –	<i>Swiss Metadata Catalogue (all libraries in Switzerland) / Multilingual authorities solution</i>
2022 –	<i>Additional networks and libraries joining (2nd wave)</i>

SLSP Figures by 2021

Libraries	c. 540
Bibliographic records	c. 30 million
Item records	c. 50 million
Patron records	c. 800'000
Staff records	c. 2'000

Product

Today

With the «SLSP System» (Library Management System) we build the foundation ...

All Swiss scientific libraries are connected in the SLSP system (Library Management System), enabling access to and search for relevant information in the huge amounts of scientific information. The SLSP system is implemented centrally for all scientific libraries in the country.

The knowledge community has access to huge amounts of information throughout Switzerland, independent of hardware and software infrastructure.

Future

... to realise the information management of the future.

Research will work with new processes and methods. In addition to published scientific information, research data and research processes that have not been published will become accessible and usable for the knowledge community.

The SLSP thus enables participatory scientific practice by ensuring the availability and archiving of research data and enabling their networking. Artificial intelligence, machine learning and the handling of enormous amounts of information are becoming central aspects.

Benefit

Today

Libraries can manage their catalogs more efficiently and get a highly competitive library management solution

- Safe
- Efficient
- Reliable
- Scalable
- Customizable
- Sustainable
- Customer support and central data management
- ...

Future

The available information can be easily found, compared, networked, evaluated and new emergent insights generated. Derived knowledge in digital form can in turn be linked to information - creating a kind of digital neural network.

The potential for science is enormous.

- Linking information, generating knowledge
- Individual use of content by the individual user
- Long-term preservation
- Contextual knowledge management
- ...

Customers

Who benefits from our services?

Customers

Today (SLSP System)

- Scientific/Academic Libraries
- Education and Research
- The Public (cultural heritage)

Future (Information management)

- Scientific/Academic Libraries
- Education and Research
- Economy
- Switzerland as innovation hub
- Switzerland as research hub
- The Public (cultural heritage & venue)
- Society

The challenge of relationships in a new structure

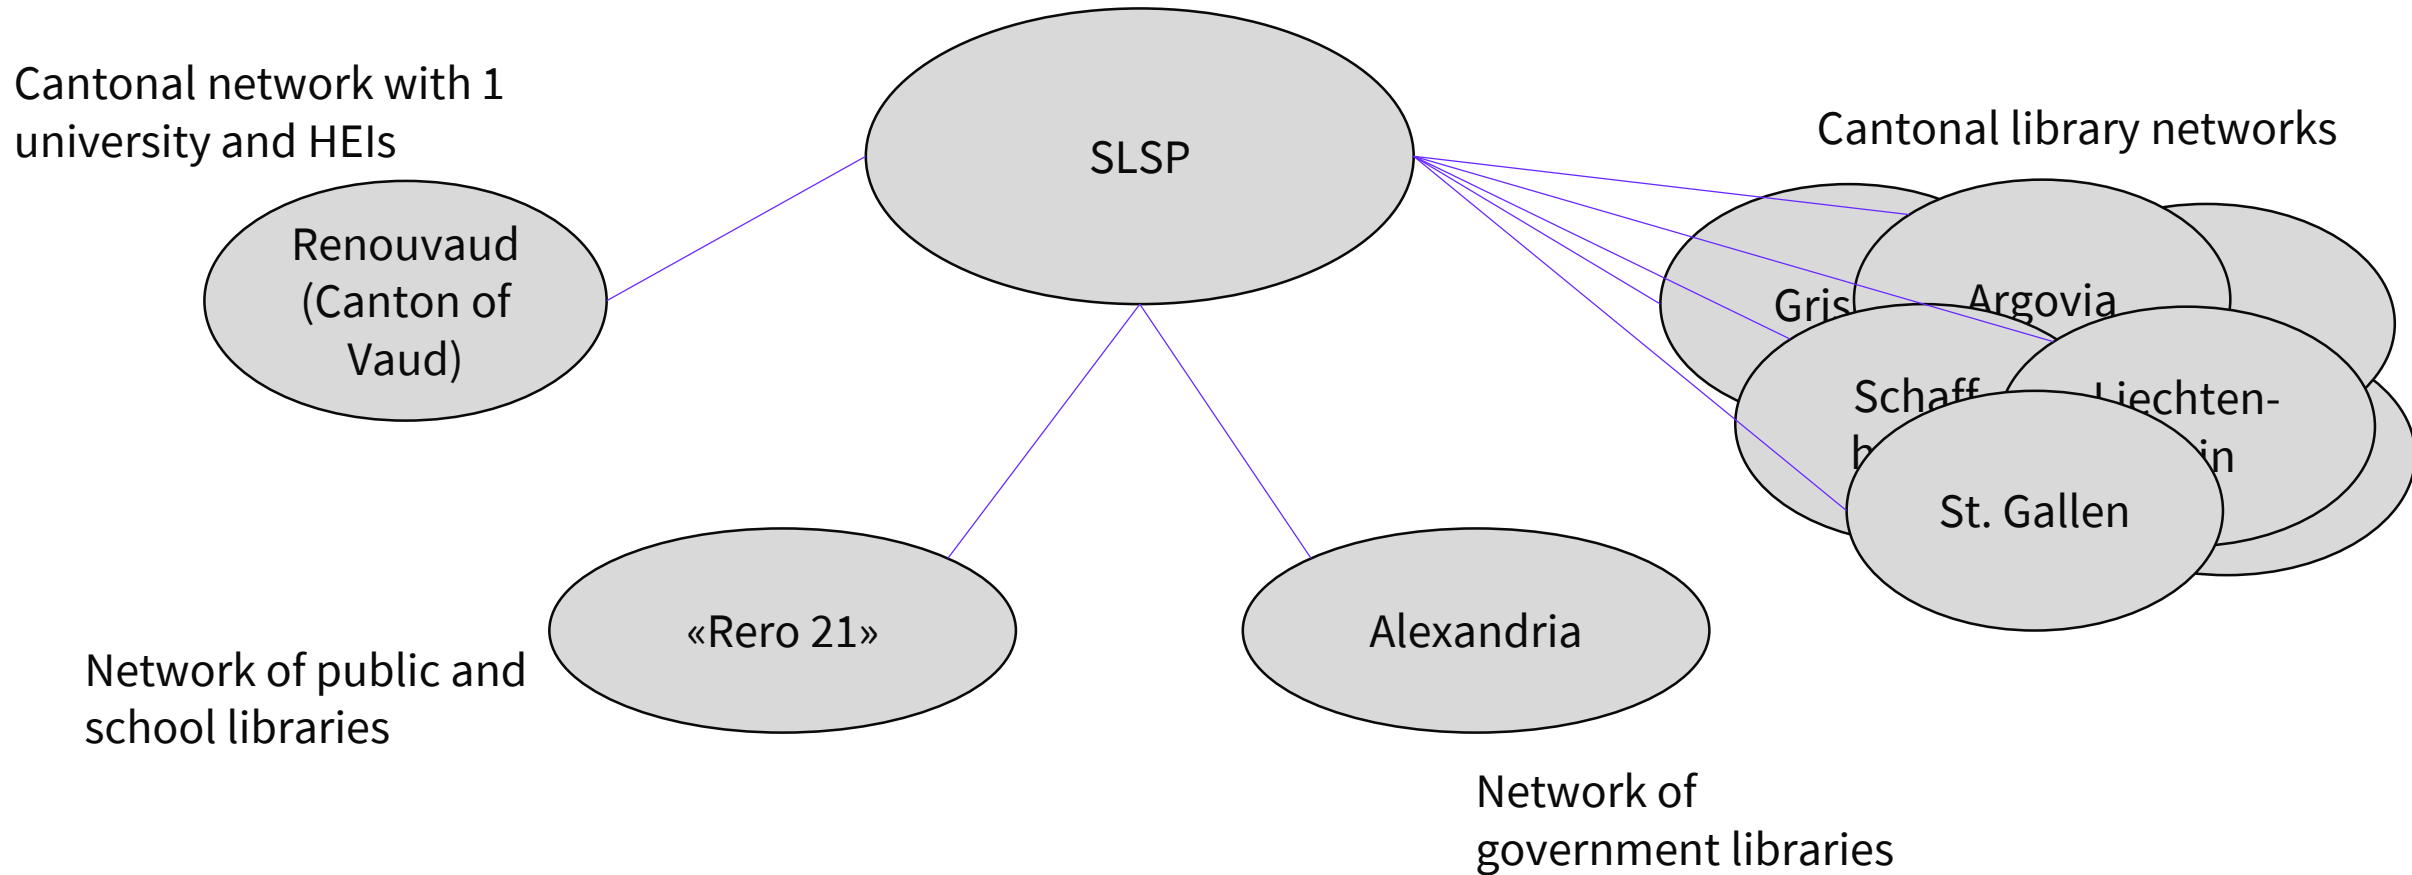

SLSP – new relationships

Goals

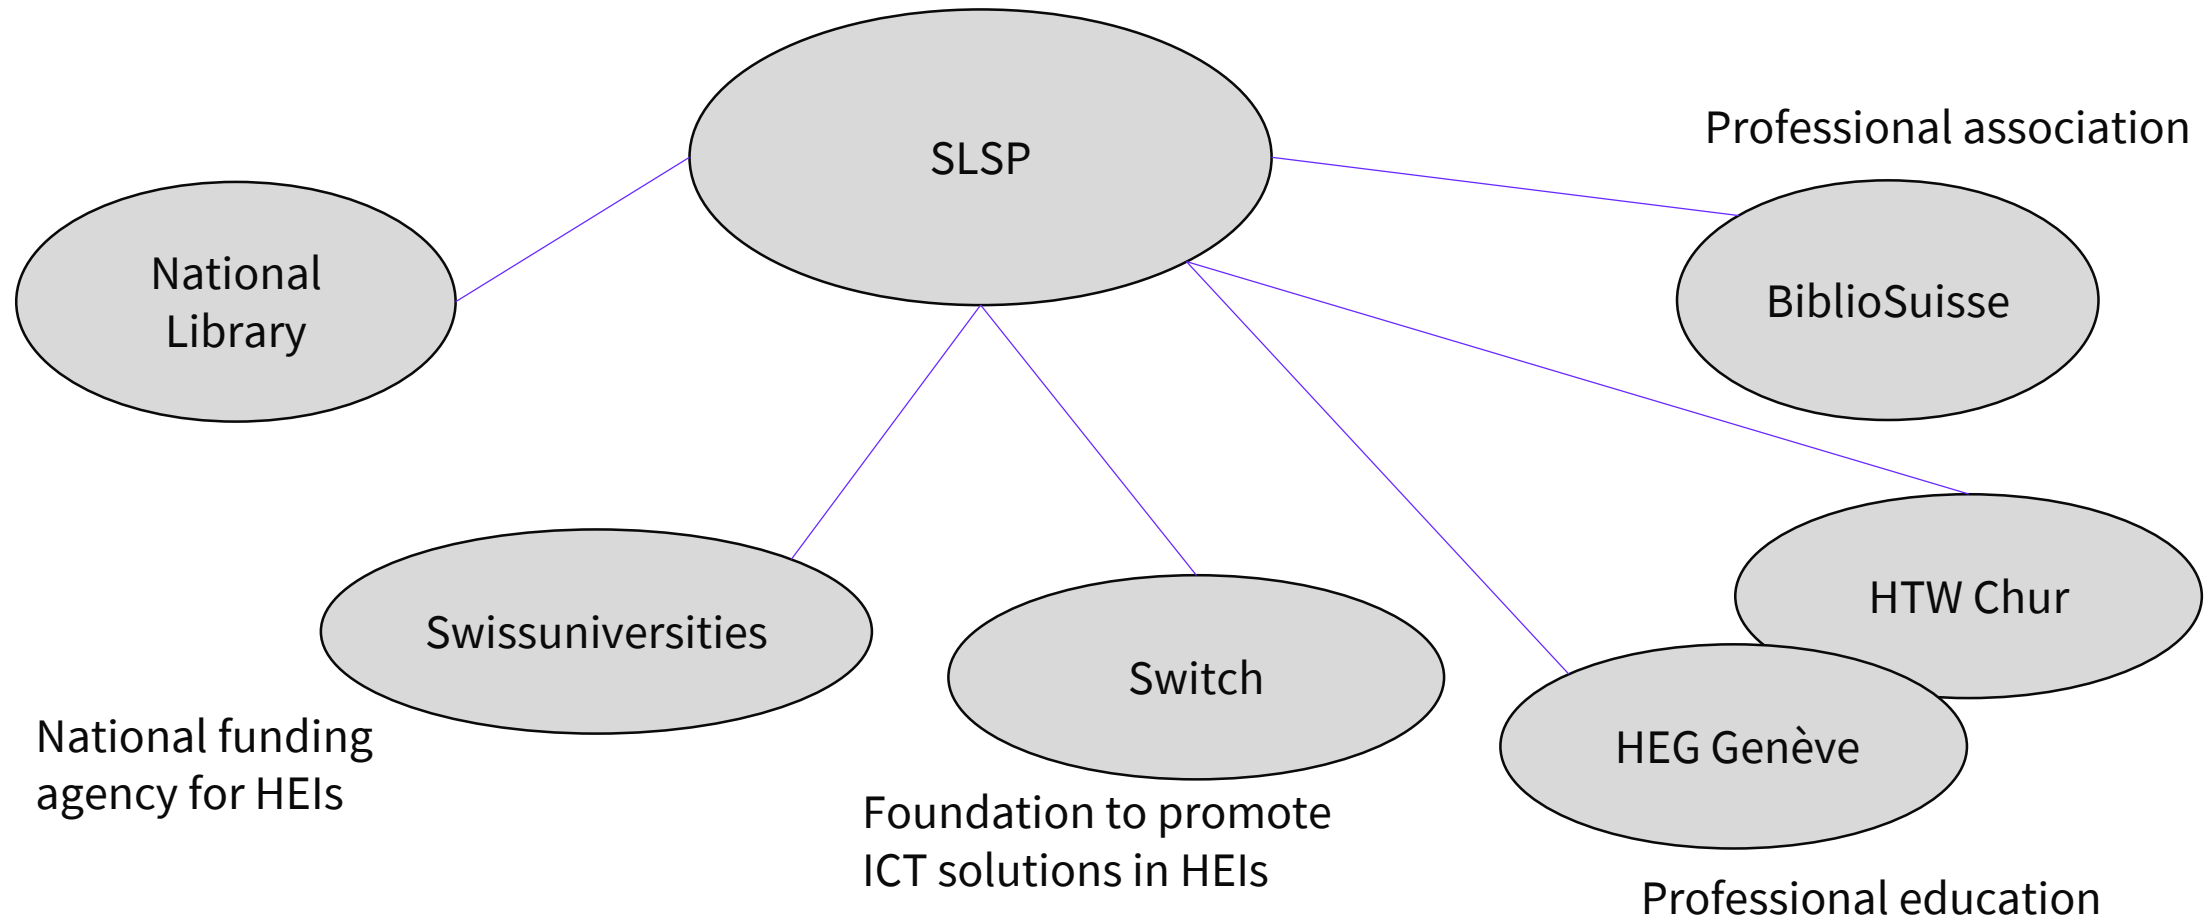

- Organisation structure (decision-making process)
- National collaboration (commissions, working groups)
- Plurilinguism
- Internal relations (between libraries and regions)
- External relations (national and international levels)
- Working conditions

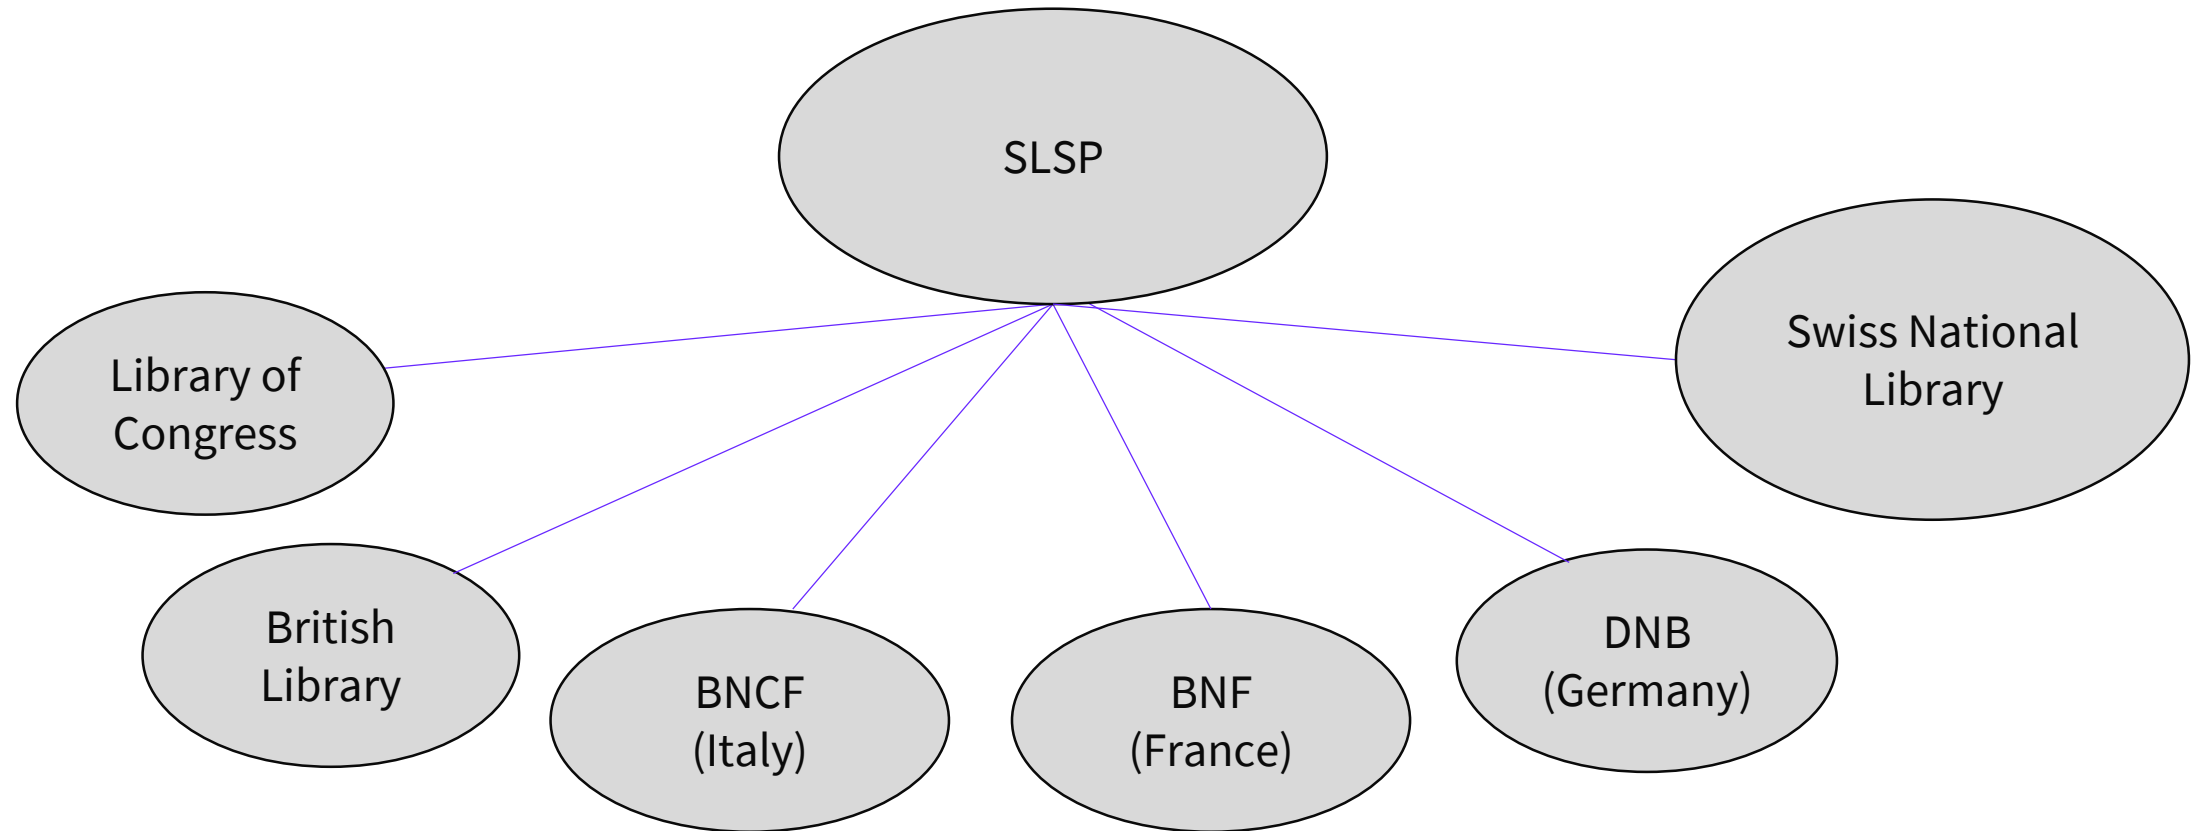

The remaining library networks

The professional actors in Switzerland

The national libraries

Topics & Tasks

- Cataloguing rules and format (authority metadata)
- E-resources (national licences)
- Document delivery (across networks)
- Discovery platform (across networks)
- Shared services (across networks)
- National repositories (digitization)
- Long-term preservation
- Exchange/international projects (Europe, IFLA...)

**Thank you very
much**
